

'Graft Your Way To Success'

INNOVATION | REGENERATION | AESTHETICS

Dr. med. dent. Orcan Yüksel

Dr Orcan Yüksel studied dentistry at the Frankfurt Johann Wolfgang Goethe University and Istanbul University. He was subsequently conferred a PhD from the Frankfurt University. He has specialized in dental aesthetics and implantology since 1993 and runs a private clinic in Frankfurt. Among his achievements is the development of the bonering technique. Dr. Yüksel is also a certified instructor of the European Association of Dental Implantologists (BDIZ/EDI). He has delivered more than 200 speeches as an international speaker and has several publications. He is also an instructor at Frankfurt University Curriculum and Master Programmes.

Synopsis of Presentation: Studies in humans and animals have shown that following tooth loss, the alveolar ridge undergoes atrophic changes. By placing implants or biomaterials in the fresh extraction sockets, these changes could be successfully stopped or minimized. The scientific literature has also suggested that grafting with an organic bovine bone mineral material can prevent ridge contraction better than autogenous bone. This lecture programme aims to promote understanding of the different bone augmentation techniques and materials for the best outcome in daily practice. Many advanced surgical techniques will be discussed. Participants will also be able to engage the speaker in a discussion to bridge knowledge and surgical skills for the use of bone graft biomaterials and their handling.

At the end of the course, delegates should have knowledge of the following:

- Updated bonering technique: New results after 5 years with allografts in 3-dimensional augmentation procedures
- Socket preservation for short and long term durations. Are there any differences of the pre-surgical conditions?
- Lateral defects and the usage of biomaterials.
- The differences of collagen biomaterials.
- Vertical defects and the usage of different biomaterials. What is the gold standard? Are there any limits?

Lecture Date: 23rd April 2016 (Saturday)

Venue: National Dental Centre Singapore Training Room (Level 8)

Time: 9.00am – 3.30pm (**Registration starts at 8.30am**)

Registration Fee: \$100 (**Pay \$50 if you register before 12th April 2016**)

Cheque Payable to: SA Dental Supply Pte Ltd
