

## Registration Form

I would like to enrol in the lecture:

- Before 15<sup>th</sup> July 2016, S\$100/- (SPS Member)
- Before 15<sup>th</sup> July 2016, S\$115/- (Non SPS Member)
- After 15<sup>th</sup> July 2016, S\$120/- (SPS Member)
- After 15<sup>th</sup> July 2016, S\$135/- (Non SPS Member)

Earlybird rates  
extended to  
15th July 2016!

Lecture fee paid can used to offset purchases during the talk (RegeDent Products)

Society of Periodontology (Singapore)  
Quintessence International – Singapore

Present:

### **Surgical & Pre-operative Management of Peri-implantitis. Differential Indications of Hard and Soft Tissue Transplantation Techniques.**

Speaker: Dr. Michael Stiller PhD, DDS

Date: 26<sup>th</sup> July 2016  
Time: 1800hrs  
Venue: National Dental Centre Singapore  
Level 8 Training Room  
CPE: 3 points

Main Sponsor: GOH Private Limited

**Michael Stiller**  
PhD, DDS  
Specialist for Maxillofacial  
Surgery and Dentist

Specialist for Implantology  
of European Dental  
Association (EDA)

Special interest  
in Implantology  
(DGI and BDIZ)  
Publication activity

#### **Present academic Appointment:**

Professor at Dental School Philipps University Marburg/ Germany  
Department Orofacial Medicine and Biomaterial Research  
Marburg

#### **Education**

1993 Licence as a general practitioner  
1993 Licence as a specialist in Oral and Maxillofacial Surgery  
1993 Doctor's degree in General Medicine  
(topic: the oral component of Sjögren's syndrome)  
1994-2014 Assistant Medical Director at the Clinic and Outpatient  
for Dentistry and Oral Surgery of the Free University of Berlin  
(director Prof.Dr.Dr.B.Hoffmeister), research work in radiology of  
salivary glands in autoimmune diseases,  
Since 1994 Lectures and courses in implantology with special regards to hard  
and soft tissue regeneration in implantology and conventional  
prosthetics  
Since 2002 Private clinic  
Since 2015 Professorship at Dental school Philipps University Marburg/ Germany  
Department Orofacial Medicine and Biomaterial Research

## Surgical & Pre-operative Management of Peri-implantitis. Differential Indication of Hard and Soft Tissue Transplantation Techniques.

Dental implantology has been a success and its application has often contributed to significant improvement in quality of life. However, the future success of dental implantology can only continue if clinicians and basic scientists actively address the problem of peri-implant infections. Reports of implant-related infections are now commonplace. Before these reverse the gains in quality of life, orchestrated efforts are required, starting from the biological response of the soft and hard tissue, to promote the complex understanding of the peri-implant pathological processes.

The aims of the lecture are:

1. To demonstrate the complexity of peri-implant problems and complications.
2. To promote understanding of the underlying mechanics and biology.
3. To derive indications and clinical implant practices that can give the best prognosis for long term sustainability.

Time	Programme
6pm	Dinner and registration
6.45pm	Lecture
9.45pm	End

Dinner and refreshments are kindly sponsored by:

GOH Private Limited
