## Our Speakers for Perio Month 2018

Dr. Benjamin Tan  
BDS, MSc, MClintDent  
(Perio), FAMS (Perio)

### Simplifying Treatment Protocols in Complex Implant Patients- Getting More by Doing Less and Doing Right.

- Date: 5 July 2018
- Synopsis:
  - Dental implant surgery is complex and challenging even in patients with good volume of bone. The difficulties increase exponentially in patients with deficient ridge width and height.
  - In addition, many patients are busy, fearful of dental visits and cost conscious.
  - The speaker will share what he considers to be a rational, evidence based and practical approach to Implant surgery that improves treatment predictability and success to patients at a reasonable cost in terms of time, money and importantly, morbidity.

Dr. Tan Hee Hon  
BDS, FRACDS, MDS

### Inter-connections 2

- Date: 12 July 2018
- Synopsis:
  - The biopsychosocial model for illness and delivery of care had been used for years, instead of the biomedical model. In addition, due to the advancement of healthcare and aging population, there are increasing number of co-occurring disorders and co-morbidities. How are these phenomenon affecting Dentistry? Are there any inter-connections between dentistry and medicine??

# SOCIETY of PERIODONTOLOGY SINGAPORE

## Our Speakers for Perio Month 2018

Dr Wu Siwen

BDS, MDS (Endo), MRD  
RCS (Endo), FAMS (Endo)

### Endo-Perio Lesions - Probing into the root of it all!

- Date: 19 July 2018
- Synopsis:
  - Teeth with endodontic and periodontic lesions often pose a clinical diagnostic challenge because of clinical and radiographic similarities. The clinician frequently faces a conundrum: to retain or replace these teeth.
  - This lecture aims to provide an overview of endo-perio lesions, highlighting the basis of clinical diagnosis, prognosis and management of these lesions, in order to aid the clinician in the decision-making process to retain or replace these teeth.

Dr. Poon Kee Huang  
BDS, M Orth RCS, MDS  
(Ortho), FAMS (Ortho)

### Probing the Ortho-Perio Mechanics

- Date: 26 July 2018
- Synopsis:
  - Let's explore the mechanics of modern-day orthodontics with respect to patients with controlled periodontitis.
  - How do we set up the case together, knowing that the periodontal support is reduced?
  - How an Orthodontist can help in such cases. How do we modify and customise mechanics to deal with common periodontal malocclusions.
